Customer journey Funnel

contact	Sum of total	Sum of subscribed	Sum of conversion_rate	Sum of crammers_v
cellular	26144	3853	14.74	0.14
telephone	15044	787	5.23	0.14
Total	41188	4640	19.97	0.29

Cellular contact achieved a **14.74%** conversion rate vs **5.23%** for telephone — a **9.51** percentage point difference (181.64% relative lift). This difference is statistically significant (**Chi² = 802.31, p < 0.001, 95% CI: 8.95%-10.06%**), though the effect size (**Cramér's V = 0.14**) is moderate. Note: this is observational data, not a randomized experiment, so causation cannot be confirmed.

Business Recommendations

1. problem

The store loses 97% of visitors between View and Add to Cart — the single biggest leak in the customer journey.

2.finding

Only 2.69% of viewers add a product to cart, but 31.07% of those who do complete a purchase. Cellular contact outperforms telephone by 181.64% in campaign conversion (statistically significant, $p < 0.001$).

3.impact

Improving the View-to-Cart rate by even 1 percentage point could add thousands of additional cart entries, given 1.4M+ monthly viewers.

3.recommendation

- 1. Prioritize cellular contact for future campaigns.**
- 2. Investigate friction points between product view and cart (e.g., pricing visibility, product page UX).**
- 3. Focus retention efforts on high-converting categories (57, 417, 1037).**
